

Git Assignment-2:

Git-Branching

```
MINGW64~/c/Users/muday/git-branching
muday@Uday MINGW64 ~/git-branching
$ git init
Initialized empty Git repository in C:/Users/muday/git-branching/.git/

muday@Uday MINGW64 ~/git-branching (master)
$ vi signin.txt

muday@Uday MINGW64 ~/git-branching (master)
$ git add .
warning: in the working copy of 'signin.txt', LF will be replaced by CRLF the next time Git touches it

muday@Uday MINGW64 ~/git-branching (master)
$ git status
On branch master

No commits yet

Changes to be committed:
  (use "git rm --cached <file>..." to unstage)
    new file:   signin.txt

muday@Uday MINGW64 ~/git-branching (master)
$ git commit -m "This is signin page commit"
[master (root-commit) a45f109] This is signin page commit
 1 file changed, 1 insertion(+)
 create mode 100644 signin.txt

muday@Uday MINGW64 ~/git-branching (master)
$ echo "This is registration page" > regis.txt

muday@Uday MINGW64 ~/git-branching (master)
$ cat regis.txt
This is registration page

muday@Uday MINGW64 ~/git-branching (master)
$ git add .
warning: in the working copy of 'regis.txt', LF will be replaced by CRLF the next time Git touches it

muday@Uday MINGW64 ~/git-branching (master)
$ git status
On branch master

Changes to be committed:
  (use "git restore --staged <file>..." to unstage)
    new file:   regis.txt

muday@Uday MINGW64 ~/git-branching (master)
$ git commit -m "This is registration page commit"
[master e951c38] This is registration page commit
 1 file changed, 1 insertion(+)
 create mode 100644 regis.txt

muday@Uday MINGW64 ~/git-branching (master)
$ git log --oneline
e951c38 (HEAD -> master) This is registration page commit
a45f109 This is signin page commit
```

```

MINGW64:/c/Users/muday/git-branching

muday@Uday MINGW64 ~/git-branching (master)
